China, the third largest country in the world, is located in the eastern part of Asia. Officially known as the People's Republic of China, the country has the largest population in the world, a whopping 1.3 billion people! China's civilization goes back thousands of years. Traditionally, the nation has been ruled by powerful families known as dynasties. A number of dynasties were in power from 221B.C to 1912. The Chinese government was taken over by the Communist Party in 1949. This party still has control of the country. One of China's most famous landmarks is the Great Wall of China. Construction of the wall began in 220B.C. under China's first dynasty. The wall was built to keep invaders out of the country. With a length of more than 5,500 miles, the Great Wall is the longest structure built by humans. Mandarin, China's official language, is spoken by more people than any other language. Mandarin is a symbol-based language, so it has no alphabet. It can be difficult to learn because it has four different tones and a neutral tone, which means that a single word can have multiple meanings. The Chinese New Year is one of the most popular holidays in China. It does not fall on 1 January, as we think of New Year's Eve. Instead, it begins on the first day of the lunar calendar. This means that the date of the holiday varies from year to year. It falls sometime between the end of January and the beginning of February. The celebration lasts 15 days and includes dragon and lion parades and fireworks. Fireworks were invented in China. Every year, after an animal in the zodiac. China VocabularyWorksheet. Beverly Hernandez Print the pdf: China Vocabulary Use this vocabulary sheet to introduce your students in China. Children should use an atlas, the internet, or a library to look up each term and determine its meaning for China. Students then write each word to the empty line next to the definition or description. China Vocabulary Study Sheet. Worksheet Chinese Days of the Week. Beverly Hernandez Print the pdf: Chinese Days of the Week Worksheet This crossword puzzle allows your students to read the days of the week in Chinese. by China Coloring Page. Beverly Hernandez Print the pdf: Flag of China Coloring Page The Flag of China has a bright red background and five gold-yellow stars in the upper left corner. The red color of the flag symbolizes the revolution. The great star represents the Communist Party and the smaller stars the four classes of society: workers, peasants, soldiers and The flag of China was adopted in September 1949. China Outline Map. Beverly Hernandez Print the pdf: China Outline Map Use an atlas to fill the states and territories of China. Mark the capital, the major cities and waterways and important sights. Science is usually a highly interesting topic for children. Children love knowing how and why things work, and science is part of everything from animals and earthquakes to the human body. Take advantage of your student's fascination with science topics by integrating fun printables and practical learning activities into your science studies. It is never too early to teach children to document their scientific laboratory results. Teach them to make a hypothesis (an educated guess) about what they think will be the result of the experiment and why. Then show them how to document the results with scientific report forms. Learn more about the men and women behind today's science by using free worksheets, such as Albert Einstein printables, where students can meet one of the most famous scientists of all time. Spend some time researching a scientist's trading tools, such as B parts of a microscope. Study general scientific principles – that people use every day, often without realizing it – how magnets work, the basics of Newton's laws of movement, and the functioning of simple machines. Earth, space, planets and stars fascinate students of all ages. Studying life on this planet—and in the universe—is a subject worth dealing with your students. Students can climb into the sky with astronomy and space exploration. Investigate weather and natural disasters such as earthquakes or volcanoes. Discuss the types of scientists who study these areas, such as meteorologists, seismologists, volcanologists, and geologists. Spend time outdoors to create your own rock collection and inside you'll learn them with Rock Printables. Children love to learn about the creatures they can find in their own backyard. Spring is a good time to study the birds and the bees. Learn more about the lepidopterists – scientists studying moths and butterflies – and entomologists studying insects. Plan an excursion to a beekeeper or visit a butterfly garden. Visit a zoo and learn more about mammals such as elephants (Pachyderme) and reptiles such as alligators and crocodiles. If your young students are fascinated by reptiles, print a reptile coloring book for them you can find a future paleontologist in your or Homeschool. If so, visit a natural history museum so she can learn about dinosaurs. Then, take advantage of this interest with a number of free dinosaur printables. As you study animals and insects, discuss how the seasons – spring, summer, autumn, and winter – affect them and their habitats. Oceanography is the study of the oceans and the creatures that live there. Many of the animals that call the sea home are very unusual looking. Help students learn about the mammals and inhabit the oceans, including dolphins, whales, sharks and seahorses, as well as: CrabsJellyfishManateesOctopusesSea TurtlesStarfish Then, dig deeper by exploring more facts about dolphins, seahorses and even lobsters.
